Smallholdings Disposal Programme

The policy of disposals is on the basis that properties with high maintenance and management costs are disposed of whilst retaining as much land as possible.

The properties sold to date are:

| | | Total for future years | | £9,400,000 |

Other properties will become vacant during this period and will be added to the list at the appropriate time.

The 10-year target of £10m is achievable in 6 years.

Notes:

Hildersley Model Farm is a phased disposal over two years.

The properties proposed for sale over the next years are those which fit in with the criteria for disposal and some opportunity sales will be added as appropriate.

The main risks and delays are in obtaining vacant possession, planning permission and a temporary fall in the market.

The figures quoted above are estimates of potential value and neither the amount nor the timing of the receipts can be guaranteed.
