

## **Herefordshire's Family Outcomes Framework**

**This document is Herefordshire's first iteration of a family outcome framework which directly supports the delivery of local strategic outcomes, primarily contained within the new Health and Wellbeing Board Strategy 2015-2018 and the Children and Young People's Plan 2015-2018.**

**This outcomes framework will evidence the impact of Herefordshire's revised approach to helping families earlier.**

**This document is designed to act as an overarching guide for practitioners, staff, managers and auditors to ensure families achieve significant and sustained improvement which will meet the requirements of the national Troubled Families programme. There will be training and a shorter practitioner's guide developed to support delivery of this document.**

**The outcomes framework will be approved in September 2015 and will then be reviewed regularly to ensure it meets changing local and national requirements**

## **Herefordshire's approach to helping families**

Herefordshire is committed to supporting the most vulnerable and challenged families and their children, which is articulated as key priorities within the Health and Wellbeing Strategy and the Children and Young People's Plan. We are dedicated and focused on ensuring all Herefordshire residents live safe, healthy, independent lives and children have a great start in life.

The new Children and Young People's Plan will help to drive forward an agenda of service transformation and early help across the council and its partners, so that there is a greater emphasis on addressing needs at the earliest opportunity and embedding outcomes-focused family plans using evidence based interventions.

One key action will be to streamline assessment processes so that the assessment stays with the family throughout; whether there are step-ups or step-downs, changes of worker or whether the case is active with universal services or within social care teams. The assessment and outcome plan provides accurate, timely and efficient monitoring and avoids families having to re-tell their story.

Below is Herefordshire's Family Outcome Framework which has been agreed locally, and provides a partnership-wide outcomes framework encompassing strategic objectives, the needs of our families and the needs of local partner organisations. It strives to achieve better outcomes for families, reduce demand and costs for public services but also reducing risk, harm and vulnerability.

By successfully achieving sustained and significant change for families we are confident of demonstrating the fiscal savings for all partners by seeing a reduction in the reactive, statutory and specialist services. The national cost savings calculator will be utilized along with data and intelligence gathered by partners to enable a greater targeted focus on families who are the most challenging and challenged within the county.

## **Development of the Herefordshire Family Outcomes Framework**

- From the beginning of this plan's development, partners from across the Health and Wellbeing Board and Children and Young People's Partnership were clear that this plan had to reflect the county's ambition to achieve better outcomes for families and provide a consistent way of measuring that. Supplementary to that, this framework also acts as a response to the national Troubled Families (TF) programme. The framework is a tool to drive performance and quality as well as for the purposes of drawing down government funding.
- The framework has been developed and approved in tandem with the production of the county's Health and Wellbeing Strategy and Children and Young People's Plan (CYPP). This document should be read in conjunction with the CYPP annual business plans for early help.
- Herefordshire Health and Wellbeing Board and its sub-group, the Children and Young People's Partnership, agreed to participate in phase 1 of the national TF programme and achieved its 3 year target of improved outcomes for 310 families in February 2015. As a result of the national and local impact, the partnership, and Herefordshire Council's Cabinet as lead accountable organisation, agreed to participate in the extended TF programme to 2020. Over this 5 year period our aim is to support over 1000 families.
- Guidance from the TF Financial Framework and exemplar outcomes plans from early starter authorities have supported the production of this first framework for Herefordshire.
- The public health outcomes framework has been used where possible to ensure that strategic outcomes are already measurable and evidenced.
- There has been an extensive consultation on this framework with individual partners, services and teams plus partnership groups and boards between November 2014 and up to approval in September 2015.
- Following the initial draft of the outcomes framework and before its final approval, Herefordshire Council's internal auditors were also consulted to ensure that the framework is robust enough to provide the evidence of significant and sustained progress in families to support any payment by results claims made to the Department of Communities and Local Government.
- Once this framework is approved there will be further development work undertaken to ensure these outcomes are used in practice by front line staff, through revised tracking tools, individuals and family outcomes plans, training and ICT systems. This will be crucial to connect improvements in individual families back to the strategic county goals.

## Identifying and working with families

- Families will be identified by a number of means across the 6 main headline areas above – through information sharing of data sets with partners or through nominations or referrals from individual professionals. The specific issues across the 6 headings are detailed in the appendix below along with the data sources for identifying issues in families.
- Herefordshire’s early help approach is currently being developed as part of the priorities within the new Children and Young People’s Plan and will include actions around workforce development; referral, assessment and planning processes; market and community development and establishing an early help offer of service. A key part will be the establishment of an early help intelligence function that will triangulate intelligence from partners to understand the issues within the family. Where the family is not already assessed and / or receiving support then their situation would be risk assessed to be able to prioritise families for assessment and support where appropriate.
- Practitioners working with families will undertake a well conducted family assessment, working with all family members to identify the issues that need to be addressed. This will form the basis of an holistic family outcomes or action plan which will address the issues and what outcomes the family is aiming to achieve. This in turn facilitates the actions to achieve those outcomes in a well-coordinated and effective approach using evidence based techniques and practices.
- The presence of at least 2 of the main headline areas above, suggests that a family may need help and meets the DCLG requirements for a troubled family. Practitioners will need to work with families to agree their outcomes, including outcomes from the appropriate sections of the outcome framework below, and write them in to the individual family outcome plan.
- If an additional issue arises, or becomes apparent, during the course of any support intervention with a family, an outcome must also be achieved for those issues to demonstrate the family has achieved significant and sustained progress.

## **Evidencing outcomes and long term impact**

The achievement of outcomes within this framework demonstrates a commitment to a proportionate and pragmatic approach that reflects genuine improvement in the family's outcomes. Where the term "family member" is used in the framework this means either a child or an adult within the family group.

We will be using a variety of sources to confirm families have achieved positive outcomes.

- The family assessment, outcome plan and review processes will provide a qualitative measure of change for families that will assess the overall wellbeing of the family as well as progress against outcomes across the six headline problems identified as appropriate. Partners may have different tools and recording processes that will achieve this.
- The outcome framework for Herefordshire (below) sets out the core outcomes and measures that indicate the Herefordshire agreed standard of significant and sustained progress.
- Evidence from those practitioners working directly with families will enable them to make a judgement on whether a family has improved significantly and can sustain that improvement long-term, so that intensity of support can be reduced and then eventually stopped.
- The views of family members through self-assessment tools will also help to confirm that significant improvements have been made and that they can be sustained.

Achievement of the outcomes for families will be monitored and reviewed by the early help intelligence function working with practitioners. This process will confirm that at the final review point the family has achieved the outcomes agreed, that support could potentially be reduced or stopped and therefore a claim can be made to DCLG. Outcomes generally will have been achieved between the time the family were identified and an intervention started, and the final review period.

Achievement of outcomes for families against this framework should ensure that significant and sustained improvement for that family has been achieved. However families will be monitored by the early help intelligence function for a longer period of time after an intervention has ended because sometimes situations arise in families that can cause a re-escalation of issues. It is better to catch those issues quickly to resolve them before they reach any crisis point.

## 1. Parents and children involved in crime and anti-social behaviour

### Lead partnership / agencies:

- Herefordshire Community Safety Partnership
- Police, Probation and Youth Offending Services

### Strategic goals and indicators:

- To reduce the number of first time entrants to the youth justice system \*
