Subject: Suggestion for scrutiny by GO&SC under item 5 of agenda

Dear Mr Baugh

Due to the Briefing Note making no mention of the LSG upgrade, work scheduled 1 June 2015 till 30 March 2016, my being informed under FOI IAT 9715 that this will entail roads such as Rockfield Road in Hereford and the road to Dinedor Camp being registered without any highway rights, and Oxfordshire suffering £1/4million costs due to negligence with highway records declaring land not to be highway, and our being in similar situation, see attached, may I suggest that a) that this area of concern be subject of scrutiny during this period by way of briefing note updates for each Scrutiny Meeting, so that we may be informed of what is being done, what progress is being made and any appropriate questions asked, and b) that HC be asked to raise a Highway Record Evidence Base, identifying what has been done in past years, what remains to be done, what data HC is and is not aware of/available, etc., so that all may be aware of the situation safeguarding against undue negligence, supporting our officers raising of appropriate policies in-conformance with an established Evidence Base, that makes use of the most cost efficient procedures ?

Rgds

Peter McKay
