

Rubix - variation application

Responding on behalf of Ps 3456 Reynolds.

As a result of a meeting and e-mail discussions with regards to this application the Police position is as followings:

The Police objection to this application will be withdrawn IF the applicant agrees to the following:

ALL existing conditions on the premises licence remain and will apply to the whole of the premises, including the external area, with the following amendments:

- The last entry time for all customers will be 0230hrs. No re-entry will be allowed for any customers after this time. A written system will be put in place by the Premises licence Holder to allow 'late night economy workers' entry to the premises after 0230hrs on production of evidence that they are employed as part of the 'late night economy' and have come from their place of work.
- The premises licence holder will have in place a Dispersal Policy which will be produced on demand to the Police or any other 'authorised person' as per the Licensing Act 2003.

To ensure there is no misunderstanding, the existing conditions (as amended as above) will remain in place, these include the restriction on the use of the external area after 0230hrs, the requirement to use poly carbonate etc vessels over 330ml and replace existing stock etc., and the requirements with regards to door staff.
