|--|-------------------------|
| Questioner: | Peter McKay, Leominster |
| Question: In December 2022 I suggested some specific highway and path record issues be a topic for scrutiny December 2022. In April 2024 I asked this committee if it would ensure that it included this topic in its work programme. The committee chair replied that they would respond to the substance of my question at the next meeting of the committee. However this matter is not included in your agenda or work programme, when will my suggested topic be considered for inclusion in your work programme? | |
| Response from the Chairperson: I have determined that public rights of way are not a matter for this committee but for the Environment and Sustainability Scrutiny Committee. I understand too that the Environment and Sustainability Scrutiny Committee will be scrutinising the council's work around public rights of way at its next meeting on 22 July, I will therefore pass on your question from February to the chair of that committee to help inform their work. | |
