

## AUDIT SERVICE STRATEGY 2005/06

### 1 INTRODUCTION

- 1.1 The Audit terms of reference are very comprehensive and are set out in the Audit Charter approved by Cabinet on 18<sup>th</sup> April 2002.
- 1.2 The strategy
- Outlines how the service will be provided.
  - State how the assurance as outlined in the annual statement on internal control will be demonstrated and will include how Audit Services will contribute to the review of
    1. The Council's corporate governance arrangements.
    2. Risk management process.
    3. Key internal control systems.
  - Establish the resources required for its delivery.
  - Set out the relative allocation of audit resources between assurance work and any fraud-related or consultancy work.
  - Reflects how the Principal Audit Manager prepares the risk-based audit plan designed to implement the audit strategy, taking account of the Council's risk management process. Any differences between the plan and resources available will be identified and reported. The risk-based plan will outline assignments to be carried out and the broad resources required for its delivery.
- 1.3 The audit plan will be kept under review to enable identification of amendments needed to reflect changes in priorities and emerging risks. Cabinet will approve material changes to the Audit Plan.

### 2 PROVISION OF SERVICE

Currently the service is provided in-house and supplemented by an external computer auditor. This mix works well bearing in mind the ever-changing world of ICT and the specific skills required for computer audit work.

ICT audit training and development will continue to be a key training area for all audit staff, and with other training will ensure that Audit Services staff provide a comprehensive audit service to the Council. The service has been under pressure, bearing in mind the ever-increasing need for computer auditing technical advice, giving

assurance on controls and the meeting of corporate ICT objectives and targets.

Additionally the Audit Commission no longer carries out any assurance work but relies solely on the work of Audit Services.

It is proposed that the service continues to be provided in-house supplemented by an external computer auditor.
